VEKAdeck, Londeck & QS Pro Railing

Acme is now a stocking distributor of the best decking and railing products in the world!!

VEKAdeck: For clean, maintenance free living!

VEKAdeck is different from most composite decks that will still absorb water, require cleaning, warp, and crack. VEKAdeck's PVC composite technology makes it almost impervious to the elements and is as

easy to clean as vinyl siding!

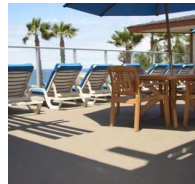

Couple that with QS Pro's custom built & sized railings, and you finally have a deck that's more fun than it is work. For both installation & maintenance!

An 8ft long QS Pro Railing section attached between two 4x4 posts with the "Z-afety" metal bracket, tested with a 1000 lb load applied to the top rail. QS Pro Railing passed and exceeded the AC-174 requirements.

If you also want your deck to be WATERPROOF? Then LONDECK is the deck for you. LONDECK is warranted to be installed over living spaces and never let in a drop of rain!!

GenFlex EPDM / TPO Roofing Workshop

Expand your product offering with GenFlex TPO Roofing! We will be having a contractor workshop & breakfast at each of our Acme stores.

GenFlex supplies both high quality EPDM and TPO roofing systems. TPO roofing allows both heat-welded seams, and an energy efficient white roof color. Heat-welded thermoplastic roofing membranes are the fastest growing segment of the low-slope roofing market. GenFlex TPO roofing systems are designed for durability and to withstand extreme environmental exposure. GenFlex TPO systems offer the widest selection in both product and system types. From dual weld seams to Peel & Stick systems, GenFlex and Acme have the TPO products you need for mechanically anchored to fully adhered systems with warranties up to 20 years depending on the system design.

Acme Introduces 2 New Product Lines for 2008

Versatex - Combines the versatility and fine craftsmanship of wood with advantages only modern engineering can provide - no warping, no splitting, and no required painting in a water-resistant, and insect - resistant trimboard. Builders enjoy easier installation, while homeowners value its superior appearance and minimal maintenance.

Stonecraft - Is a premium stone veneer at a great price from the same people that bring you Tapco brakes and Mid America siding components. We will show you just how easy it is to install this cultured stone!

Take a Look at the Atlas 35 Year Pinnacle!

DISTINCTIVE
DESIGNER SHINGLES

Are you looking for a low-price alternative to the 30 year dimensional shingles on the market? Take a look at the Atlas Pinnacle!

With increasing competition these days for roofing jobs, often the final decision for the homeowner or builders comes down to price. Atlas Pinnacle 35 will set you apart from the other bids

Atlas Pinnacle 35 year Shingle in Hearthstone Gray.

with its unique design and warranty that are unparalleled in today's market. **For the same price as other 30 year dimensional shingles, Atlas Pinnacle gives you 35!**

The Pinnacle premium shingle is truly top of the line. It is a true laminated dimensional shingle, featuring distinct shadow lines that provide a traditional wood shake look. Full random cuts ensure that the appearance of undesirable patterns will not occur. Pinnacle also offers algae resistance to further increase the lasting beauty and elegance of your roof. A wide variety of shingle color options ensure a perfect complement to any color scheme. Pinnacle promotes beauty, elegance, lasting performance and peace of mind with its 35 year limited transferrable warranty that is unmatched in the industry!
